

Half-Day Workshop

Using Google Calendar to Improve Memory & Organisation after Brain Injury

This half-day workshop will provide an opportunity for allied health clinicians to develop skills in using Google Calendar as a memory-rehabilitation approach, based on best-practice evidence.

Lectures & Workshop Facilitation from:

Susan Petrie, Senior Occupational Therapist, Independent Rehabilitation Services; and

Kate Phillips, Clinical Leader, Independent Rehabilitation Services & TAC/Worksafe Clinical Panel.

This workshop is aimed at allied health professionals who work in neuro-rehabilitation and provide, or wish to provide, memory rehabilitation training with clients.

Content to be covered includes:

- Use of Electronic Memory Aids after brain injury
- Intervention and protocols used to improve functional memory including Google Calendar
- Results from the recent Google Calendar research study completed in Melbourne, Australia
- Provide resources and discuss outcome measures used in the Google Calendar research study

COST OF ATTENDANCE: \$205

Registration costs include lunch and afternoon tea, plus training manuals and an opportunity to trial the intervention

PLACES ARE STRICTLY LIMITED

To register your interest or pay your registration fee, please contact Annie at Independent Rehabilitation Services. Alternatively, you can register via Eventbrite.

47A Karnak Road
Ashburton
VIC 3147

ABOUT THE RESEARCHERS

Susan Petrie is a senior neurological occupational therapist who has completed two trials in using Google Calendar with adults after brain injury. Susan has 9 years of experience in stroke and brain injury rehabilitation in Australia and the UK.

Natasha Lannin is a neurological occupational therapist and rehabilitation researcher with more than 20 years' experience. Natasha currently leads a program of research dedicated to improving the evidence underpinning rehabilitation for adults with brain injury. She has extensive experience in using electronic memory aids, smart-phone technology and establishing memory and organisation plans with patients living with severe brain injury or stroke.

Kate Phillips is a neurological physiotherapist with more than 20 years' experience treating people with acquired neurological injuries. Kate currently leads a community multidisciplinary team and has an extensive knowledge of neurorehabilitation and the care and needs of people living in the community. Kate is the Clinical Leader of Disability on the TAC/Worksafe Clinical Panel and is a Research Affiliate at National Trauma Research Institute.
